## SUMMARY

Experienced backend developer with a strong foundation in Python Django, JavaScript, TypeScript, Node.js, and C# .NET. Over three years of hands-on experience designing, implementing, and maintaining scalable and efficient backend solutions. Proven ability to collaborate with cross-functional teams to deliver high-quality software solutions. Adept at problem-solving, code optimization, and staying current with emerging technologies.

## EXPERIENCE

### Junior Backend Developer

#### Eccles IT Ltd

📅 2021 📍 Remote

##### Software Engineering

- Created a REST API using python and django to predict user expenditure based on their transaction history.
- Implemented the web back-end using django rest framework and postgres database to store user records.
- Utilized Facebook's prophet to create time series model to predict user expenditure.
- Worked on optimizing and refactoring existing codebase to improve performance and maintainability.
- Collaborated with cross-functional teams to troubleshoot and resolve bugs and issues in a timely manner.
- Contributed to the implementation of automated testing processes to ensure code quality.
- Participated in Agile development methodologies, including sprint planning, daily stand-ups, and sprint reviews.

### Backend Developer

#### Dowell Solutions

📅 2022 📍 Remote

##### Software Engineering

- Developed and maintained backend services using Python Django ensuring scalability and performance.
- Collaborated with front-end developers to design and implement RESTful and GraphQL APIs for seamless communication between frontend and backend systems.
- Integrated third-party APIs to enhance functionality and streamline processes.
- Implemented and maintained database models, ensuring data integrity and optimal performance.
- Conducted code reviews and provided constructive feedback to team members, contributing to a collaborative and high-performing development environment.
- Participated in daily stand-ups, sprint planning, and retrospective meetings to ensure efficient project management.

## TECHNICAL SKILLS

Python

JavaScript, TypeScript

C#

Django, Django restframework

API

.Net Entity core

Nodejs, Expressjs

PostgreSQL

MySQL

MongoDB

Github, GitLab, Git

RESTful, GraphQL

Docker, Jenkins

AWS, Azure

## EDUCATION

### Software Engineering

#### ALX Software Engineering School

📅 2022

## EXPERIENCE

---

### Backend Developer

#### Aegle Health

📅 2023 📍 Remote

#### Software Engineering

- Developed server-side logic and backend services using Node.js and C#.NET, contributing to the overall architecture of the applications.
- Collaborated with front-end developers to design and implement RESTful and GraphQL APIs for seamless communication between frontend and backend systems.
- Participated in daily stand-ups, sprint planning, and retrospective meetings to ensure efficient project management.
- Implemented and optimized database interactions, ensuring data consistency and performance.
- Contributed to the development of scalable and maintainable code, adhering to best practices and coding standards.
- Participated in code reviews, providing valuable feedback to enhance code quality and team collaboration.
